

triangleinteriors

Furniture for Offices, Education, Health & Leisure

PRODUCT BROCHURE

# DEVELOPED BY EXPERTS

## Fire Rating

All our upholstered furniture complies with the requirements of industry specific fire ratings. Only combustion modified Ether foam is used in our products.

## Webbing

Elasticated interlocking webbing platforms are used to supplement and enhance the design comfort of all our products.

## Suspensions and Springs

These form the basis of the support systems of all chairs and are fully guaranteed. We use tested and proven systems that have stood the test of time in care home use over 25 years.

## Unique Hygiene Platform

Where appropriate, our products are designed with our unique hygiene platform. This means that leakages or spillages that occur in the seating areas are contained in this area and so can be easily cleaned. This reduces the risk of ingress into the furniture.

## Foams and Fillings

Foams and fillings are chosen for their unique properties in fulfilling the comfort and support needs of your residents.

## Ergonomics and Sizing

From conception all our products have been developed with the ergonomic requirements of the client group in mind. Seat depths, back heights, variable seat heights and the angles of pitch on backs have all been considered in the initial design process. This ensures there are options available to correspond with varying client needs

## Supportive Cushioning

All cushions are specified for performance. Firm enough to stand up to constant use and soft enough to provide comfort for your residents.

## Frame Build & Quality

Frames are built to last. We specify the use of sustainable hardwoods in all of our products. Traditional use of glued doweling & mortice and tenon joints are commonplace throughout our designs. These are enhanced by the use of screws as the design dictates.

## Hygieni-lac

We use Anti-Microbial lacquer on all wooden surfaces to help prevent the spread of acquired infections.

## 5 Year Guarantee

All our chairs have Hardwood frames & the joints are Glued, Screwed & Dowelled,

## Anti-Microbial Fabrics

All fabrics have had an Anti-Microbial treatment to help prevent the spread of acquired infections.

## Tough Top Tables

Tables have a special heat & scratch resistant surface, suitable for care home use.

## Fire Retardant

All fabrics conform to BS 5852 Ignition Source 0, 1 & 5 (Crib5)

## Strengthened Furniture

Furniture can be strengthened to cope with more challenging environments.

Look for the **Strong Man Logo**

## Express Delivery

7 Day delivery available on selected models

*Experienced suppliers of furniture for the care home sector; we are well established to create safe, robust items that meet the needs of older people. All our products are trialed and tested so you can be certain that your furniture will meet all requirements.*
